

## Save \$795 on the DP/Charge Payment Server when you sign up with OpenEdge!

*Data Pro Accounting Software has partnered with OpenEdge to offer you a secure, integrated payment solution that allows you to accept credit cards directly within DP/Charge, minimizing costly reconciliations while improving cash flow.*

### Features and Services

- **Data Pro Accounting Software** offers secure payment technology that supports standard and recurring transactions using the **OpenEdge Token Vault**. "Token Vault" uses **OpenEdge's Point-2-Point** encryption and replaces card holder data with digital "tokens" where sensitive data is stored off-site in the secure **OpenEdge** vault rather than in the merchant environment.
- **OpenEdge PCI Validation Program with Breach Guarantee**. Once you achieve and maintain **PCI DSS** compliance, you may be eligible to be reimbursed up to **\$100,000** by **OpenEdge** for forensic reviews, fines and card re-issuance costs resulting from a card data breach.
- **OpenEdge EMV Solution – Coming Soon!** This fraud-reduction technology protects card issuers, merchants and consumers from losses due to the use of counterfeit and stolen payment cards at the point-of-sale. EMV Smart Cards are embedded with a chip that interacts with a merchant's POS device, ensuring the card is authentic. This chip technology is virtually impossible to duplicate.
- **Better-than-bank Merchant Services**. Keep your deposit bank, but let **OpenEdge** deposit your credit cards. Aggressive rates, better support, and no need to sign a "Cross Default Clause."
- **Free CustomerCare** – Provided by **OpenEdge's** expert staff **24/7/365**.
- **Free Detailed Pricing Analysis with Price Guarantee**. **OpenEdge** pricing experts have analyzed thousands of merchant accounts! Just for Data Pro customers, **OpenEdge** will beat your current rates or any other published offer you have in hand. They are so confident they can save you money that they are offering a **\$100** gift card if they can't beat your best price.\*\*
